**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Status of Claims*

- [1] Claims 1-5 are pending.

### *Claim Rejections - 35 USC § 102*

- [2] The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

- [3] Claims 1-5 are rejected under 35 U.S.C. 102(b) as clearly anticipated by Suzuki, US-4,080,803, because the invention was patented or described in a printed publication in this or a foreign country, or in public use or on sale in this country more than one (1) year prior to the application for patent in the United States.

The shape and appearance of Suzuki is identical in all material respects to that of the claimed design, *Hupp v. Siroflex of America Inc.*, 122 F.3d 1456, 43 USPQ2d 1887 (Fed. Cir. 1997).

As for Claim 1, Suzuki teaches of a secondary ring (Fig. 2), comprising:

Art Unit: 3677

a first portion (5) hingedly coupled with a second portion (6) at a first end of said first and second portions (via 7);

said first (5) and second portions (6) selectively coupled at a second end of said first and second, defining an open condition ring (Fig. 2) when not selectively coupled and defining a closed condition ring when selectively coupled (Fig. 3).

Re: Claim 2, further comprising ornamentation (5) on at least one of said first (5) and second portions (6).

Re: Claim 3, further comprising a coupling (8,9) between said second ends of said first (5) and second (6) portions.

Re: Claim 4, said coupling comprising a coupler (9) on said first portion (5) and a coupler receiver (8) on said second portion (6).

Re: Claim 5, coupled about a jewel (2) on a primary, finger-worn ring (1).

Art Unit: 3677

*Conclusion*

[4] The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The following patents are cited further to show the state of the art with respect to this particular type of ring; as well as their extreme relevance to the current application as many read extensively onto the claimed invention: please see submitted notice of reference cited.
